**HOUSING AND RENTAL MANAGEMENT SYSTEM**

The system aims to help landlords and housing associations to manage their properties effectively.

Poor housing management, poor communication between landlords and tenants, poor services provided by the caretaker and poor payment procedures and follow ups are the problems that are majorly faced by tenants.

Thus the system aims at solving the above problems by ensuring better housing management, improved communication between landlords and their tenants, better provision of services by the caretaker and a secure payment procedure for the tenants.
